

The planned Sinclair anti-Kerry program is a blatant political broadcast and equal time should be given to Kerry's people--if this piece of garbage is allowed to pollute the airwaves to begin with. How about a little fairness and true democracy in this country that is supposedly trying to export those blessings to other parts of the world? For God's sake, somebody has to stand up to the forces of hate who are trying to rig the system. Is it too much to hope for the Republican-controlled FCC to show some integrity? I'm guessing it is but you could surprise me and the rest of the world by showing some moral courage. Thanks for listening.
